Farmers Unduly Pressed by Creditors Should Write Debt Adjustment Bureau At Once

Special Arrangements Made by Alberta Government Through Bureau to Deal With Exceptional Conditions Confronting Farmer Debtors This Season

To meet the exceptional conditions confronting many Alberta farmers this season, due to the pressure of their obligations at a time of severely depressed prices, special facilities to assist farmer debtors in making adjustments with their creditors have been arranged by the Alberta Government through the Debt Adjustment Bureau. The Bureau has been in existence since 1923, and has since that year enabled thousands of farmers who otherwise would have lost their farms, to surmount their difficulties and remain in possession of their land. In view of the extraordinary conditions now prevailing, the facilities available have recently been widely extended.

Farmers who require advice or assistance in meeting any unreasonable or unfair pressure which now or in the future may be brought to bear upon them are therefore urged to get in touch with the Bureau without delay. A questionnaire will be mailed by the Bureau to all applicants, who will be requested to fill in all details of their cases, for the guidance of the Bureau in its efforts to effect adjustments. Farmers residing in Southern Alberta, should write to W. Loree, Director of the Debt Adjustment Bureau, Land Titles Building, Calgary (Phone M4844); while those residents in the northern portion of the Province should write to Mr. Loree at the office of the Debt Adjustment Bureau, 7th floor, McLeod Building, Edmonton (Phone 24227).

The need of prompt action on the part of any farmer who may be subjected to undue pressure, cannot be too strongly emphasized. A frank statement of his position should be submitted to the Bureau as a preliminary to further action. Delay may add to the difficulties which the Bureau may experience in bringing about a desirable adjustment for the protection of his position, in addition to which delay is bound to result in increased and unnecessary expense.

In his role of mediator between farmers and their creditors, Mr. Loree is in constant consultation with the representatives of mortgage and loan companies, and banks, and individual lenders of money, with implement houses and lumber companies, etc., and in the vast majority of cases it has been found possible to effect adjustments to the advantage of both debtor and creditor. This season, as previously stated, the facilities of the Bureau have been greatly amplified in order that it may give the greatest possible assistance in tiding over the period of depression through which agriculture is now passing. The services which the Bureau may be able to render will not involve any costs to the farmer.

It may be pointed out that in making application to the Bureau the farmer is simply invoking its assistance as a mediator between his creditors and himself. He does not thereby relegate himself to the position of a bankrupt, or compromise his position in any way.

Types of Claims
Generally speaking the creditor's claims with respect to which the farmers in the Province may be experiencing some distress can be grouped into the following classes:
"Executions in the sheriff's hands directed against chattels."
Foreclosure actions by mortgage and loan companies or unpaid vendors of land.

Seizures under chattel mortgages held by banks and others.

Seizures under chattel mortgages on crop held by storekeepers or others who have supplied necessities.

Seizures by mortgage companies and others under crop share leases.

Seizures by implement companies or finance companies under lien agreements or chattel mortgages.

Seizures by municipalities for arrears of taxes.

The rights of the various creditors' interests, indicated above, vary according to the Statute law pursuant to which the security was obtained

WOODS IS CONFIDENT RECOVERY COMING SOON

Believes It Will Be More Rapid in Canada Than in Any Other Nation.

"We have been passing through a hard season, but the dawn is here. We are like those who have been walking through a tunnel with the bright sunshine showing at the end of it. The spirit of our people has not faltered and does not falter in the face of troubles that have been somewhat intense, and the recovery of our people will be more rapid and more thorough than that of any other nation that I know of."

This was the optimistic message of J. H. Woods, Calgary, President of the Canadian Chamber of Commerce, at a joint luncheon of the Toronto Board of Trade, Canadian Club and Empire Club today.

"We are not the only people who have been shocked by the new conditions that face the marketing of food products, and as the months go by we realize that even more completely than our troubles in this respect were due only to local conditions or to local mistakes, but that they have been and are part of a world change which will involve, in some measure at least, a reconstruction of the world's basic industry, namely the production of food from mother earth," continued Mr. Woods.

"And in this regard," he said, "I do not hesitate to speak to you about the pool system of marketing. I have no brief for the Pool, nor any excuse or explanation to offer for any errors that it may or may not have made. Concerning these, I am not sufficiently expert to be a judge. But it is my firm conviction that the Wheat Pool is the greatest stabilizer of the morale of the farmers of the West that exists today. To it in great measure these farmers have pinned their confidence and their pride as masters of their own commercial destiny, and in my belief, the destruction of that confidence, the psychological results that would inevitably follow upon an abandonment or even partial abandonment of the system that they themselves have created, would be an injury almost beyond calculation."

At All Costs Retain Enough Wheat for Seed

In view of the generally prevailing conditions it is of the utmost importance that farmers at ALL COSTS should keep out of this year's crop sufficient wheat for seeding next spring.

It is pointed out that seed wheat is one of the articles which the law makes exempt from seizure for debt, except in cases of execution by a sheriff pursuant to a judgment following action in court. Except in such cases, no creditor can force a farmer to sell wheat which he will require for seed for next year's crop.

"Do not allow any pressure on the part of any creditor to make you part with the wheat you will require for seed."—U.F.A. Paper.

Don't forget the Ladies Aid Bazaar to be held in the Church next Saturday, November 1st.

WEEKLY REVIEW PROV. MARKETS

Markets as Revised by the Market Examiner, of Calgary, For This Paper:

BEEF—Prices show little change. Choice heavy steers made \$5.25 to \$5.50; choice light \$5.25 to \$5.50; good \$5.00 to \$5.25; medium \$4.25 to \$4.75; common at \$3.50 to \$4.00. Choice heifers made \$5.25 to \$5.50; good \$5.00 to \$5.25.

FEDERS, STOCKERS—Demand has broadened and little difficulty experienced in turning over all offerings. The feeder steers sold at \$4.00 to \$4.50; stock steers \$3.50 to \$4.50; stock cows \$2.50 to \$3.75.

HOGS—Edmonton reports 25c decline; bacon \$10.50; select \$11; butchers \$10.15, fed and watered basis.

SHEEP—Edmonton prices practically unchanged. Yearlings \$4.50 to \$5; ewes \$2.50 to \$4.50; lambs \$6 to \$7.

CREAM—Prices steady. 27¢ to 29¢; first, 25¢ to 27¢; second 22¢ to 24¢.

POULTRY—Prevailing quotations for this week are: Chicken, No. 1, over 5 lbs., 12¢; No. 1, 4 to 5 lbs., 12¢; under 4 lbs., 10¢; No. 2, 8¢. Fowl, No. 1 over 5 lbs., 11¢; 4 to 5 lbs., 10¢; under 4 lbs., 8¢; No. 2, 5¢.

EGGS—Further advances made in prices on Monday last. Some houses boosted prices 2c, others 3c. Receipts light and storage stocks moving out. Opinion expressed that B. C. pullet offerings may shortly appear on Alberta market, as they are quoted at very favorable prices. Alberta quotations: Extras, 28¢ to 30¢; firsts, 26¢ to 28¢; seconds, 22¢ to 24¢. Demand fairly active.

HAY—Offerings continue light due to weather conditions and harvesting not yet being completed. Demand is only fair. Improved trade expected if cold weather continues. Underdone of market weak, although prices unchanged, with upland at \$11.50 to \$12, and timothy \$16 per ton, on country points.

OATS—Demand rather slow in developing despite low prices. Receipts continue on light order. Quotation of 30¢ per bushel, delivered, is prevailing.

GREENFEED—A little more activity in this market during past week, but only for small orders. Quality good. Price unchanged at \$10 to \$11 per ton.

HIDES—This market shows no change from previous week.

WOOL—Practically nothing being handled by jobbers. Reports indicate that only a few small lots being held in country. Price unchanged at 7¢ to 8¢ lb.

The Saturday evening dances are again being run every Saturday evening from 9 to 12 in Kiefer's Hall, Irma. Admission: Gents 55c, Ladies free.

Notice is hereby given that, under the provisions of The Tax Recovery Act, 1929, the Municipal District of Battle River No. 423 will offer for sale, by public auction, at the Municipal office at Irma, Alberta, on Thursday the 13th day of November, 1930, at 2 p.m., the following lands:

Section	Fract.	Ac.	44	7	4	Area	8	Ac.
N. E. 36	44	7	4					
S. W. 4	45	7	4					
S. Half of								
N. W. 4	45	7	4					
N. W. 30	46	9	4					
N. E. 34	46	9	4					
S. E. 25	46	7	4					
N. W. 25	46	7	4					

The above lands will be offered for sale subject to a reserve bid, and reservations contained in the existing certificates of title. Terms: Cash unless otherwise arranged. Redemption may be affected by the payment of the arrears of taxes and costs at any time prior to sale.

Dated at Irma, Alberta, this 4th day of September, 1930.
R. J. TATE, Sec.-Treas.

CHURCH NOTICES AND ACTIVITIES

Sabbath Day Finds the Community Joining in Observance, Prayer, and Church Attendance.

UNITED CHURCH NOTES
The services next Sunday will be at Strawberry Plains, Roseberry and Town. It is World's Temperance Sunday and the topic will be "Alcohol and Human Life."
We want to remind our friends that we are making plans for the Anniversary Services which will be held on November 23rd. Watch for further particulars.

The Ladies Aid is holding its annual bazaar on Saturday, November 1st, in the Church. We desire the hearty co-operation of all friends to make it an outstanding success.

The Rev. J. R. Geeson attended the Presbytery meeting which was held at Ryley Wednesday and Thursday last.

ANGLICAN CHURCH

Next service will be held on Sunday, November 2nd in Irma United Church at 3 p.m. Everybody welcome.

A W. A. meeting will be held on Tuesday next, October 28th at the home of Mrs. Carter (north of town) at 2:30 p.m. Every lady welcome.

ST THERESA CATHOLIC CHURCH IRMA, ALBERTA

Service on the first Sunday of each month at 11 a.m.

LUTHERAN CHURCH SERVICES

Service Bethania, November 2nd at 11 a.m. with communion.

Threefolded at 2 p.m.
Sharon, Coal Springs at 4 p.m.
All are cordially invited.

T. T. Boe, Pastor

Household Hints

EVERYDAY RECIPES

Raised Doughnuts—When baking bread take about one and one-half pounds of bread dough. Add half cup butter, two-thirds cup sugar, two eggs. Mix in with dough. Add three-quarters cup water and enough four to mix stiff. Let rise and work down. Roll out about three-quarter inch thick. Cut with doughnut cutter and let rise again, until light. Fry in deep lard to light brown. Roll in sugar.

Nut and Date Loaf—One and one-quarter cups brown sugar, three quarters cup butter, two eggs, one package dates chopped fine, one cup walnuts, three-quarters cup cold water, level teaspoon soda, one and one-half cups flour. Mix in order given, beating eggs separately and favor with almond.

Delicious Brown Bread—Two cups Graham or Whole Wheat Flour, two cups white flour, two cups buttermilk or sour milk, half cup raisins, half cup syrup, one teaspoon soda and one teaspoon salt. Mix dry ingredients together. Make a well in center. Pour in syrup and buttermilk, stirring well. Bake in loaf tin one hour with oven moderate.

Layer Cake—Half cup butter, cup sugar, three eggs, two cups flour, three teaspoons baking powder, quarter teaspoon salt, half cup milk. Cream butter and sugar. Add well-beaten eggs and beat again with butter and sugar very light. Sift flour baking powder and salt together, and add to first mixture alternately with milk. Beat lightly about one minute. Bake in layer cake tins fifteen to twenty minutes. Fill with one cup sugar, one egg, one lemon, mixed together and heated until thick.

Fruit Loaf—One cup brown sugar, half cup shortening, creamed together. Two and one-half cups sour milk, one and one-half cups flour, one cup chopped dates, one cup chopped walnuts, four cups entire whole wheat flour. Make one long loaf or two short loaves. Bake about one and one-half hour in slow oven.

The roads have dried up well after the heavy snow. With the exception of some places where the snow had drifted very deep the dust is flying.

Irma Talkies

"ILLUSION."

In this picture which is an adaptation of Arthur Train's famous "Ladies Home Journal" novel, Nancy Carroll plays the part of a partner in a magician act with Charles (Buddy) Rogers. Buddy Rogers and Nancy Carroll grew up together in a circus; they are partners in a magician act. Nancy loves Buddy but he is more interested in June Collyer, society heiress. His charm and handsome appearance make him a favorite in society.

Admits 45c. 1:00 p.c. Talking

Edmonton, Alta., Oct. 21, 1930

Charles Wilbraham, Esq., Secretary-Treasurer, Village of Irma, Irma, Alberta.

Dear Sir:

Replying to your letter of October 18th, we regret the recent interruptions to service which were largely the result of the very severe storm which we had recently. On occasion this has involved opening up our lines and sectionalizing, and picking up the load on our Standby plants. These switching operations, of course, have some times involved short interruptions, but in an endeavor to locate and clear our trouble, and restore service as quickly as possible, such short interruptions were necessary. This Company is continually exerting every effort to improve its service, and is sparing no expense in effort or equipment to attain this. At the present time additional equipment to improve conditions is being installed in Wainwright, and we expect that such more equipment will be installed shortly; the matter being now in the hands of our Engineering Department.

With regard to the interruptions which we had on October 18th and October 20th, it was supposed that our switches had tripped due to trouble on our lines. These, however, have been patrolled by a large gang of men, and no sign of trouble whatever could be found; and on the completion of the patrol, the line was put back into operation without any disturbances. Undoubtedly there was trouble of some sort, but it left no trace by which it could be located and eliminated, and we are at a loss as yet, to know its cause. The matter, however, is being carefully followed up.

Yours very truly,
Calgary Power Co., Ltd.

Harsh, Gripping Purgatives Are Dangerous!

Cheap, harsh laxatives may prove very costly. Painful rectal troubles are often aggravated by the unnatural griping condition such cathartics cause. ENO is pleasant, gentle, safe and sure. A daily dash of ENO'S "Fruit Salt" in a glass of water, morning or night, tones up and sweetens the entire system. Acid stomach, flatulence, biliousness, quickly disappear.

Our National Parks

On May 9th of this present year, a Bill to be known as the National Parks Act passed the House of Commons and was shortly afterwards ratified by the Senate and signed by the Governor-General.

This marked the beginning of a new era for the National Parks of Canada. They have now reached that state of importance in the administrative eye which entitles them to a separate Act. Formerly they were simply an afterthought administered under the Dominion Forest Reserve and Parks Act. No longer can they be considered as the house which was built upon the sand. The new National Parks Act is the rock upon which will be built a park system of which Canadians for all time will be justly proud, a system which will endure, a system having the stability of a mountain. No longer will the parks boundaries and policy of administration fluctuate with the rise and fall of the various political parties in power at Ottawa, because they can never again be made the political policy of any party, but are the policy, property and pride of each and every individual Canadian in this broad Dominion.

By the former Act all matters affecting parks were under the direct control of the Minister of the Interior through the Parks Branch, and an order-in-council could without the consent or even the knowledge of Parliament establish new parks, relinquish all or part of the present parks, sell or lease any water power, timber berth, mining claim, or other commercial concession in the boundaries of any park.

By the new Act, thirty days' notice of any such matter affecting the parks must be published in the Canada Gazette, and then the matter takes the form of a private bill and may be thoroughly discussed by the people's representatives in Parliament before becoming law. Surely a reasonable way of dealing with park areas which belong not to any individual community or province but to the people of Canada as a nation.

It is well that such protection has been thrown around our great and expanding system of National Parks, because as population increases and the country becomes more and more industrialized, efforts to secure portions of National Parks areas for purposes of commercial exploitation become more numerous and harder to resist. Yet they must be resisted if the beauty, and therefore the value, of our National Parks is not to be destroyed.

An water is the life of all landscape pictures, so lakes, waterfalls and rivers are often, and generally, the chief attraction in a National Park. Destroy their natural beauty, and the park itself is largely destroyed. Nevertheless water-power companies become impatient upon securing rights to utilize these water powers for hydro-electric purposes. Already a large area has been taken out of Banff National Park. The Spray Lakes area, for hydro development, and now the hydro interests demand the famous Lake Minnewanka district in the same park.

Once embarked on a recognized policy of alienating water-powers in our National Parks for commercial purposes and a precedent is established which will be cited by other interests. Our National Parks are rich in forests. With the waters and mountains they constitute the beauty of the parks; without them there would be little or no water. But the lumbering interests look upon them with envious eyes, and if the water-powers are to be exploited by the hydro companies, why not the forests by the lumbering interests?

So, too, some of the National Parks are believed to be rich in minerals, but what would become of these parks if unscrupulous mining companies, with their piles of refuse, old derricks, ugly mine buildings, and all that is inseparable from mining camps and towns were allowed to spring up within their borders?

But if the door is opened to commercial exploitation in one direction, it will be well-nigh impossible to stop it in other directions.

The water-powers, the forests and the minerals within our National Parks undoubtedly have a commercial value, but so, too, have the Parks themselves in their natural state of beauty. Commercial exploitation of the forests would in a few years lessen and in time destroy their value. Cutting of the trees would lower and ultimately destroy the lakes, rivers and waterfalls. Mining operations in time would exhaust the minerals. Commercial intrusions in the National Parks would mean a gradual depreciation in values.

But retention of our National Parks in all their natural beauty will add to their commercial value to Canada as magnets which will attract ever-increasing numbers of tourists from all parts of the world, while maintaining for Canadians of future generations the rights and benefits of great national playgrounds, places of inspiration, and of health-giving happiness.

It is well, therefore, that the new National Parks Act has become the law of Canada. In this Dominion, as in the United States, we must face the fact that commercialism is the peril of our National Parks system. The almighty dollar, declared by Washington Irving to be the American god, is the obscuring deity. The struggle is between the lower and the higher, the sordid and the ideal.

Speaking for the then president of the United States at the annual opening of the Yellowstone National Park in 1923, Dr. John Wesley Hill said: "Regardless of all facts and figures, arguments, appeals and threats, any plan however meritorious on its face for the commercial exploitation of parks must by the very nature of its aims and purposes be immediately doomed to failure. Good projects, bad projects, indifferent projects, all must face the same fate, for it is the established policy of the Government that our national parks must and shall forever be maintained in absolute, unimpaired form, not only for the present, but for all time to come." This fixed policy will not be swayed a hair's breadth by any influence, financial, political or otherwise. If rights are granted to one claimant, others must follow; so a precedent must not be established. It would inevitably ruin the entire National Parks system."

Canada can do no less, and if any attempt is made, no matter in what guise, to infringe upon the rights of all the people in their National Parks, they should arise in their right and end any such attempt. The power is now in their hands by virtue of the new National Parks Act.

Atlantic Sardines

Atlantic sardines are the young of the herring which in immense numbers frequent the waters of the Grand Manan and Passamaquoddy Bay districts in New Brunswick.

Seek Lower Rate

On Cattle Shipments

Negotiation For Decrease In Transportation Charges On Exports To Britain

Hon. Robert Weir, Minister of Agriculture, is in negotiation with the Atlantic shipping companies and the railways in an effort to obtain a decrease in the transportation charges on cattle exported to Great Britain, which will open up this market to large scale shipments from western Canada.

The negotiations have not proceeded far enough to warrant any forecast of results. Mr. Weir, however, has got to the point where he is advocating an entirely new policy, endeavoring to change the whole basis upon which rates have been imposed in the past.

In regard to the ocean rate, Mr. Weir is endeavoring to have the whole rate basis changed. He wants shipping companies to quote rates by the ton instead of by the head. Such an arrangement would give shippers advantages in shipping stock of various weights. A definite decision in this regard will be reached before long.

When Languid And Anaemic

When a girl is languid, dull and irritable; when her color fades and she can't get on her feet; when her blood is impoverished; when a girl's blood is poor her nerves are starved and there is serious danger of a decline. Rebuild the blood, strengthen the nerves and good health will follow.

Dr. Williams' Pink Pills are of untold value as a blood-builder. Concerning Mrs. John Finin, Howland Station, P.E.I., says:—"My daughter was badly run down; pale, nervous and under weight. We decided to give her Dr. Williams' Pink Pills. After a few boxes she gained in weight, her appetite improved and color came to her cheeks—in fact she fully regained her former good health."

You can get these Pills at all medicine dealers or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

For Underwater Safety

Invention, Ensures Escape From Submarines At Great Depth

R. H. Davis has perfected an invention which will enable escape from submarines far under the sea. The invention consists of a breathing bag which is supplied oxygen by a small cylinder of oxygen fixed below it. Poisonous carbonic acid gas of the sealed breath is absorbed by a cartridge of soda lime. A special suit containing the breathing apparatus is donned in case of accident under the water. It has been tested at a great depth.

Health cannot be looked for in the child that is subject to worms, because worms destroy health by creating internal disturbances that retard development and cause serious weakness. Miller's Worm Powders expel worms and are so beneficial in their action on the system of the little sufferers are restored to healthfulness, all the discomforts and dangers of worm infestation are removed, and satisfactory growth is assured.

New Aircraft Engine

A revolutionary type of aircraft has been developed in South Africa. The weight of the engine per horse-power is said to be far a quarter to a third less than that of other engines. It is said to have no rods, crank-shaft, shaft reduction gear or timing gear, and there are only one-sixth the usual number of parts.

Minard's Liniment aids tired feet.

A Garden Of Sorbs

He had been to the manager's office to ask him for the day off so that he could dig up his garden.

"But, my good man," said the manager, "Jones told me only the other day that you hadn't got a garden."

"Well, someone must have taken it off the window-sill," was the calm reply.

Many mothers can testify to the virtue of Mother Graves' Worm Exterminator, because they know from experience how useful it is.

Wanted To Be Polite

A few days ago, a gentleman called what he supposed to be the telephone number of a friend downtown, and asked to speak with him. "I'm sorry," a young lady's voice informed him, "we have no one of that name here." "This," she continued "is the office of Davis, Polk, Wardwell, Gardner & Reed." This, it happens, is the name of a prominent law firm. The gentleman may or may not have realized this, but at any rate he was stunned by the lengthiness of the title. He made the first remark he could think of, "I—I hope they're all well," he ventured, and hung up.

"Pointers on Bread Making"

Keep Highway Open In Winter

No. 1 Highway Between Winnipeg and Brandon May Be Open For Winter Travel

No. 1 highway between Winnipeg and Brandon may be kept open all winter for auto traffic. It is stated. To combat the heavy snowfalls that closed the highway early in 1929-30 winter months, the department will probably use two large snow plows of new design, with one of the units stationed at the western end of the highway here and the other working west from Winnipeg. Should the task of keeping the highways not be overly heavy, there is every probability of the Minneapolis-Brandon-Boisvieux route being kept open too.

For some years now there has been an effort to secure snow-fighting units that would work effectively on the highways. The Retail Merchants Association and the Board of Trade co-operated for two winters in a work that kept roads into Brandon from neighboring districts open. Since that time the department has been approached to establish a more permanent force for winter road maintenance, and plans are now shaping in that direction. In view of the importance and the amount of traffic over the Winnipeg-Brandon highway this road will get first attention in the new scheme for all-year-round traffic.

Relieves Asthma At Little Expense

Thousands of dollars have been vainly spent upon remedies for asthma and seldom, if ever, with any relief. Dr. J. D. Kellogg's Asthma Remedy, despite its assurance of benefit, costs so little that it is within reach of all. It is the national remedy for asthma, far removed from the class of doubtful and experimental preparations. Your dealer can supply it.

For Uniform Text Books

Elimination Of Foreign Produced School Text Books Greatly To Be Desired

Reporting intensive activity in the elimination of foreign produced school text books from the schools of the country, the education committee of the Toronto Chamber of Commerce expressed the opinion that there is an over pronounced tendency on the part of both the education authorities and the Canadian public to favor wherever possible, text books edited and published by Canadian and British authors and houses.

From a special committee formed in Alberta, came the suggestion, that since the individual provinces have complete charge of education, the provincial ministers of education could probably participate in a round table conference for the purpose of reviewing the text book situation in Canada and of seeking as much uniformity as possible.

Persian Balm

The unrolled toilet requisite. Essential to every dainty woman. Imparts rare charm and beauty to the complexion. Softens and beautifies the skin. Makes hands flawlessly white. Cools and refreshes. Relieves roughness. Ideal for true feminine distinction. Delicately fragrant. Swiftly absorbed into the tissues, leaving no stickiness. Persian Balm invariably creates a subtle elegance and charm.

Teacher: Now, in getting the meal, what is the first and most important thing?

Class (in chorus): Find the can-opener!

Russia, with a greater population than the United States, has only 9,000 automobiles.

Conquers Pain

The ideal rubbing liniment for muscles or joint pains, swellings, sprains and rheumatism.

Sat On Top Of World

Few Canadians Had This Experience During Eclipse Of Moon

Men who literally sat on top of the world for a moment are described by Dr. Willard J. Fisher, of Harvard Observatory in a report just published on the 1927 moon's eclipse.

These men were a far-flung line of fur traders, trappers, missionaries and hunters in Northern Canada, and at the moment of total eclipse their shadows were exactly on top of the round, black shadow of the earth as it slipped over the face of the moon, 240,000 miles distant.

A 100-inch telescope might have shown there the rough outline of the hills around them cast in the upper edge of the shadow on the moon.

Astronomers wanted to know just how much sunlight passed over this top edge of the world horizontally through the earth's surface atmosphere. To figure this they needed weather, cloud and haze conditions along this rim. George A. Wendt, of the Canadian Westinghouse Company, Limited, established the KDKA short wave broadcast to reach the men on the "rim" by radio.

They were advised two months in advance what the astronomers wanted. Radio was the only way to reach them. Months after the eclipse Dr. Fisher received the report, and now after long computations, their astronomical value has proved up. They show that clouds shut out light horizontally across this top of the world to a height of 2,000 meters, more than a third of a mile. This cloudy layer was almost as opaque as solid earth, and had few breaks.

Comments Development

In Transportation

Visitor To Canada Amazed At Railway Facilities In Dominion

Delighted with what he had already seen of Canada and expressing amazement at the developments which have taken place in transportation facilities in the Dominion, Gordon B. Roelph, "The Examiner" and the "Weekly Courier," of Launceston, Tasmania, left Montreal on the "International Limited" of the Canadian National Railways, for Toronto, en route to Vancouver to sail for home.

Radio and telephone connections to and from moving trains were an amazing development to him, Mr. Roelph stated, while the speed of "The International Limited" six hours for the 334 miles journey between Montreal and Toronto, was one at which he had never anticipated travelling over such a distance on any Canadian railway.

WHOLE FAMILY HAD DYSENTERY

Dysentery is one of the worst forms of bowel complaint and should be checked at once as its termination often proves fatal.

Mrs. H. F. Stewart, Findlater, Sask., writes:—"Two years ago we were all very bad with attacks of dysentery. My husband got a bottle of Dr. Fowler's Extract of Wild Strawberry and after taking three or four doses we were completely relieved. Since then we have never been without a bottle of it in the house."

On the market for the past 85 years; put up only by The T. Millburn Co., Ltd., Toronto, Ont.

Cut Down Food Wastage

---by covering all perishable goods with Para-Sani Heavy Waxed Paper. Para-Sani moisture-proof texture will keep them fresh until you are ready to use them.

You'll find the Para-Sani sanitary knife-edged carton handy. Or use "Centre Pull" Packs in sheet form for less exacting uses. At grocers, druggists, stationers.

Appleford Paper Products Limited

Vast Sodium Sulphate Deposits Located In Saskatchewan One Of Richest In The World

A survey conducted by Dominion government experts has revealed that Saskatchewan possesses one of the greatest deposits of sodium sulphate in the world, according to a bulletin issued by the provincial bureau of publications. It is further stated that exploration of these deposits is now well advanced and present indications that they are a potential source of wealth to the province.

It was stated by an official of the bureau of publications that the company engaged in the preparation of the sodium sulphate found in Horseshoe Lake is employing local labor almost exclusively. The payroll of the firm amounts to \$7,000 each month, it was said, and this amount is distributed in an area where the crops for the past two seasons have been extremely light.

The statement as issued by the bureau of publications is as follows: "The alkali lakes of Saskatchewan, which in days gone by were only considered as salt licks for cattle are unquestionably designed to be a source of considerable wealth to the province in the near future.

"For many years these deposits were referred to rather contemptuously as 'alkali' or 'stink' lakes, and were not even considered worthy of investigation. As a rule, vegetation did not flourish in their vicinity, and their only visitors were the range stock that, urged by some primitive instinct, came to lick the crystals, which science now declares to possess considerable veterinary virtue.

"During the war when an Empire-wide search was being conducted for nitrates, these deposits came under the expert eyes of science, and it was discovered that some of them contained vast quantities of sodium sulphate of remarkable quality.

"A survey of some of these Western beds, conducted a few years ago by members of the Dominion Geological Survey, indicated that Saskatchewan possessed a considerable portion of the world's supply, and for the first time in the history of the province definite information was obtained in respect to this valuable natural resource.

Sodium sulphate deposits occur in the beds of lakes that in the past have been designated as 'alkali.' Sometimes these lakes are practically dry, and sometimes there is a surface of water, seldom deep and varying according to the season covering the material. The usual condition is shallow water in spring and early summer, which disappears as the season advances by evaporation, and incorporation with the sodium sulphate. When there is no water present, the surface presents the appearance of glass ice, but is much harder.

"To a stranger approaching one of these lakes during the summer, the condition he witnesses may well make him doubt the evidence of his senses. Here is a lake during the warmest portion of the year apparently frozen solid. So remarkable is the similitude, that it requires a close examination to dispell the illusion. In certain places about the deposits, dark, evil smelling springs well up from the nether depths, and it is a popularly accepted theory that they contain the chemical that forms the sodium sulphate.

"The beds of this material may be shallow or of great depth. In one extensive deposit the crystal deposit has a depth of nearly 140 feet. In some cases there may be slight layers of mud or vegetable debris, but on the whole they are remarkably clean.

"Under normal conditions the sulphate deposit contains a large percentage of moisture, often 50 per cent, and in the past the chief problem facing those desirous of utilizing the product was to evolve a process of dehydrating it economically and in commercial quantities.

"Sodium sulphate is an essential in certain industries, and a valuable adjunct in others. It is an essential in the manufacture of kraft paper from pulp wood, and is regarded as the ideal digestant in all kinds of pulp manufacture. It is used extensively in dye works, textile manufacture, leaded glass, tanning, photographic supplies, and is the basis of many of the most valuable remedies. Lately it has been found that sodium sulphate is a valuable agent in the refining of nickel, and it is understood that there may be a considerable demand for it in connection with other metal processes.

In the past most of the sodium sulphate used in Canada, chiefly in connection with the kraft paper industry, has been a synthetic material made from the by-products of hydrochloric and sulphuric acid. This synthetic sodium sulphate was manufactured at American chemical centres such as Pittsburgh, Cincinnati and Philadelphia and imported into Canada free of all duty. Owing to the short railway haul and other favorable conditions in the past, the natural product of Saskatchewan was unable to compete with it.

Now, however, a complete change has taken place. The industry to benefit the sodium sulphate found in Saskatchewan. A new process has come into use in connection with the manufacture of these acids that leaves no residue and the economical manufacture of synthetic sodium sulphate has, during the last year, become a thing of the past. Chemical engineers declare that it is doubtful if there is now any of the synthetic sulphate as a base for the synthetic product to be had nearer than Chile in South America. Furthermore, the demand for sodium sulphate for the treatment of ores can hardly fail to exercise a stimulating effect upon the whole country.

"The problem of successfully dehydrating, or dehydrating the material has been completely solved. A new mining company, which during the last year has erected a large plant at Ormiston, in this province, is drying it at the rate of about 100 tons per day. This concern has already shipped about 7,000 tons to the great nickel works near Sudbury, Ont., where they have apparently found it so successful in refining operations that they are at present taking their total output. Another company operating at Dunkirk, also in southern Saskatchewan, is drying and shipping in considerable quantity. A large demand seems to be springing up, and there is little doubt that this industry will have the effect of adding materially to the wealth of the province."

Debt Adjusting Plan

Saskatchewan Sheriffs Will Co-Operate With Commissioner

Letters have been sent to each of the 300 governing bodies of the rural municipalities of Saskatchewan advising them that the sheriffs of the province will co-operate with the debt adjusting commissioner in referring all cases in which arbitration between debtors and creditors is asked for, to the commissioner, it was stated by Hon. Howard McConnell, Minister of Municipal Affairs.

It was further indicated that the municipalities had been asked to report all cases needing this assistance to the sheriff.

This action has arisen out of the meeting of the special committee of creditors and debtors, which was held recently at the parliament buildings, Regina. Following this meeting, at which representatives of various retail bodies, financial institutions, the United Farmers of Canada, Saskatchewan section, and the wheat pool were present, it was recommended that the sheriffs be asked to assist in the matter of debt adjustment.

The special committee was called to assist of representations to the government by the United Farmers of Canada that the creditor groups were, in many cases, pressing unduly for payment and that a condition of financial status existed among the farmers of the province.

Soybean Becoming a Valuable Product

When Oil Is Extracted Residue Makes Good Stock Feed

A chemical analysis of soybean varieties being developed and tested by the agriculturalists of the Dominion Department of Agriculture show a very close relation between protein and fat content in the soybean. The correlation is fairly constant. The greater the amount of fat or oil in the bean the lower the protein content and vice versa.

This is a development of special interest at the present time, in view of the fact that the commercial value of the soybean crop depends directly on the market price obtaining for oil or protein respectively. In tests of some twenty-five varieties grown at Ottawa, and eighteen grown at Harrow, Ontario, protein content ranges from 40.82 per cent. to 46.05 per cent, with the fat content ranging from 20.18 per cent. to 15.18 per cent, respectively are reported.

The soybean has two commercial uses, the production of soybean oil, and the use of the residue in the form of soybean meal or cake which, because of its high protein content makes a valuable live stock feed.

Won Fortune By Good Nature

A smiling face and unflinching kindness won \$10,000 for Martin L. Benson, 19 years old, son of Mr. and Mrs. John Benson of Oakland, California. Ben R. Allison, Oakland attorney, revealed that Frank R. Chadwick, banker, who died last year, left the youth that sum because the banker was impressed with the cheerful spirit with which the youth performed services for his friends.

In the first eight months of this year 36,505,099 pounds of hoppers have been caught in the Atlantic coastal waters of Canada. This is an increase of nearly 3,000,000 pounds over the catch in the corresponding period last year.

AUTOGIRO AEROPLANE

The great inventor, Thomas A. Edison, with James Ray, vice-president of the Pifcain plant, standing beside one of the autogiro aeroplanes of the company, which was flown for his benefit.

Alberta's Wild Roses

Beautiful Flowers Made By Crippled Children Of Junior Red Cross Hospital

Alberta has been fortunate of late in having many visitors with her borders from all parts of the world. Since Royalty has set the fashion for the West, the world and his wife must follow suit, and in "doing" Canada, must include the land of the foothills where the Prince of Wales leaves his state cares behind and is having amongst his neighbors as the owner of the Bar U. Ranch, at High River.

En route to High River the visitors pass through the modern city of Calgary, less than fifty years ago a cow-town of wooden sidewalks, and today one of the most thriving and brisk of western cities.

One of the sights of the city of which Calgarians are immensely proud is the Crippled Children's Hospital under the Junior Red Cross, where sick and afflicted little ones are receiving care. One of the little cripples in the Junior Red Cross Hospital is the fact that boys and girls are given an education, while they are in bed, and can go right through the grades from one to eight. They also make flowers for sale and have received many orders from all over the world.

When the Alberta banquet was tendered to visitors at the C.N.R. Exhibition at Toronto this year, the guests were favoured of wild roses, the emblem of the province. These beautiful flowers were all made by the little cripples in the Junior Red Cross Hospital of the city of Calgary.

Saskatchewan Milk Pool

Creamery Plant To Be Erected At Saskatoon

Starting a little more than three years ago with no assets, the Saskatoon Milk Pool, which now has assets of \$75,000, will enter the creamery business. A large plant will be erected at Saskatoon shortly to take care of expanding interests, officials announced recently.

To date, the Milk Pool has handled only shipments of whole milk, preparing the surplus for sale as cream and milk powder. During the last year 16,500,000 pounds of milk, valued at \$425,000, were handled. The Pool is a purely co-operative organization with Saskatoon district farmers as directors.

Manitoba Poultry

Exhibit At World's Poultry Show In London, England, Attracts Attention

Three birds exhibited by W. H. Shepherd of St. Vital, a suburb of Manitoba, at the recent exhibition of the world's Poultry Congress in London, England, and which were bid in at the public auction following the show, for the royal farms of Yugoslavia, have resulted in a further order from the same farms for 20 more birds.

Western Wheat For Foreign Ports

According to figures prepared by the Merchants Exchange of Vancouver, Western Canada has been supplying the South American Republic of Colombia with about 20,000 tons of grain each year for the past five years. The largest cargo of wheat ever shipped from Vancouver left for Shanghai the other day, carrying more than 450,000 bushels.

Minister Of Railways Says Work At Port Churchill Is Months Ahead Of Schedule

Canada Provides Britain With Breakfast Foods

Prepared Cereals Now Dominate Market Says Trade Commissioner

Canada supplies most of the prepared breakfast foods for Great Britain, according to Harry A. Scott, Canadian Trade Commissioner at Liverpool. Apart from two or three English products, and the notable exception of shredded wheat, which is now being manufactured in England by the Canadian company, "nearly all the advertised lines of breakfast foods are imported from Canada."

According to a report from Mr. Scott, the present demand for the Canadian products has been built up and maintained through large-scale advertising campaigns, coupled with intensive sales methods.

In his report to Canada Mr. Scott discloses that the "Prepared cereals foods have to a large extent displaced the so-called porridge oats supplied in bulk."

"There is still a very considerable proportion of the population clinging to the old-style porridge," he reports, going on to say, "This applies more to the older generation in the extremely conservative market. It is the middle-class population that mainly supports the advertised package article; the poorer working classes still buy bulk porridge oats, which retail at comparatively low prices," Mr. Scott reports.

FOR DEB DAYS AND LATER

All Tingey models are created and sketched in Paris and the patterns are made in New York.

A youthful air makes this frock most attractive for sub, deb, and younger women types. It would be a lovely college dress, and is equally suitable for office, home and general wear.

Carried out in beige-brown tweed with cuffs, vestee and collar of lighter beige washing silk, the frock would be delightful. Similar schemes with blues or greens would also be charming. Navy with white collar, vestee and cuffs, and a blue and white spotted tie is an especially stunning scheme as you can see from the picture. In this coloring reps is a nice material to use. The belt can be of self-tissue or leather.

This pattern may be obtained in sizes 14 to 20 and 34 to 40. It is ready for immediate delivery. It is hand cut.

Send 25 cents (in stamp or coin) to Fashion Bureau. Write carefully and plainly your name and full address, the number of the pattern and the size you want.

Back from a flying inspection trip of Hudson Bay Railway and Churchill, Hon. R. J. Manion, Minister of Railways and Canada, expressed keen satisfaction with the progress of the work.

"Unless something very unforeseen or unexpected happens," Dr. Manion declared, "we will be able to open Churchill for test shipments next September. The railway, with its shape right to Churchill and I was most impressed with Churchill harbor, as, when properly dredged, it can hold an immense fleet.

"There remains a good deal of work in regard to the arranging of insurance rates, chartering vessels and matters of that nature, but steps are being taken well in advance to see that nothing is overlooked.

"While I have never visited Port Nelson, I have had reports on it, and it is my opinion that Churchill was a very wise choice of the terminal, possessing a natural harbor with some dredging required. As to the future of Churchill as a shipping port, of course, time and experience of the route alone will tell, but many are most optimistic about Churchill becoming one of the most important ports of the world.

Approximately half of the deep water main dock is completed, Dr. Manion stated, months ahead of schedule. "The dock would be completed, including filling, before the end of 1931. With respect to dredging, Dr. Manion stated that 50 per cent of the work had been performed, while a similar percentage of the filling had been done. The water supply problem, of a difficult and unusual character, had been apparently solved, the minister declared. "Progress was being made in accordance with the schedule. The main elevator contract provides for completion not later than September 15, 1931, Dr. Manion explained, with a penalty of default of \$1,000 per day. Contracts for 3,600 kilowatt power house, the minister said, call for completion not later than September next, with a penalty clause for any default.

"With an elevator of practically continuous capacity of 40,000 bushels per hour," the minister declared, "it should not be difficult to load one average tramp boat per day, to be increased to three boats when the dock and all grain conveyers are completed.

Dr. Manion was accompanied on his trip by his deputy, V. I. Stuart, Col. A. E. Dubuc, chief engineer of the department; C. D. Howe, of C. D. Howe & Co., designing engineers; Vice President Warren, of the western division, Canadian National Railways and officials of the system.

No Getting Out Of It

News has reached Berlin that Polish people must take a bath at least once a month whether they need it or not. The Polish government is introducing a law under which every inhabitant of the country will be compelled to take at least one bath a month. What is more, he must have a card stamped to prove it.

Skyscraper Not Popular

Skyscrapers are evidently still frowned on in London, England, for recent regulations passed by the government limit the height of public buildings, exclusive of dome towers and other special roof structures. The height is now restricted to six or eight storeys for office and apartment buildings.

Before Marriage: Spooning around. After: Forking over.

"What are the four elements?" "Water, earth, air." "Come, what causes all the accidents?" "Motor cars."—Duen Humor, Madrid.

Ontario Walnuts Best

Kent County Famous For High Grade Products

For walnuts, Kent County, Ontario, long famous for a variety of high grade farm and orchard products, claims to be in the front rank. This was proven recently at the Nut Growers' Conference held at Cedar Rapids, Iowa, when an exhibit of Japanese walnuts grown by Harold English, whose farm is close to Chatham, was declared the best ever seen by those in attendance at the Conference. Large size, good cracking, extraction quality, and fine flavour were the points on which the experts based their decision. The tree from which these fine nuts came is a beautiful specimen and has made very rapid growth. It is only six years old and has borne two good crops.

Helped With Problems

Canadian Farmers Receive Many Publications and Circulars Free Of Charge

The Department of Agriculture at Ottawa, through its Publications Branch last year distributed to farmers all over Canada free of charge a total of 4,361,370 publications, bulletins, circulars and reports. In addition to this material 256 press articles and 198 magazine features were supplied. This is one of the ways in which the farmer is helped with his problems and kept in close touch with the condition of his markets and important new developments in agriculture.

Made Trip In Style

Phoning the railway, at Memphis, Tenn., a negro representing himself as the assistant superintendent of the Pullman Company, ordered a car to be attached to a certain train going to St. Louis. It was to be locked and a porter would go too. The car was coupled with the train. A negro who represented himself as a porter got aboard, rode to St. Louis and left the train at Union Station before his deception had been discovered.

Doctor: "The more lawyers the longer the case." Lawyer: "The more doctors the shorter the case."

Client: "Are you sure this life belt will support me?" Salesman: "Quite, and it it should fall you will get your money back."—Alit for Alla, Stockholm.

Advertising Stimulates Trade

IRMA TIMES

The Alberta Oil Gazette

H. W. LOVE, Prop.

A Good Advertising Medium and a
Reliable Newspaper on Oil Activities

The province has experienced one of the worst winters and cold spells in October that can be recalled by the old-timers. The fall of 1919 was somewhat similar from this time of the year on, but most of the farmers had their threshing finished. The feed situation is much better than ten years ago, and the experience gained at that time is of some value, should this winter be similar. However, with mild weather approaching, there is hope that the threshing can partially be completed at least, and the outlook as we write this is very much brighter than a couple of days ago. Major Strange, the former wheat king, sounds the optimistic note that the recent snow has done little damage to the wheat. However, the grain may have been damaged some, but if the price goes up as a consequence of the storms, it may be a blessing in disguise. We must always remember that this country has a great cornstock, and the majority of the people in it are just as quick to regain their optimism and bright outlook. Let us avail ourselves of every opportunity of talking, thinking, and making better times.

The government may set aside any day they see fit as Thanksgiving and Armistice Day, but the Eleventh of November will always be Armistice Day to the boys who served in the forces, and the people of Canada as a whole. It's about the time the government shut that out.

BULBS FOR WINTER FORCING IN THE HOME

The amount of trouble needed to grow bulbs in the house is well repaid by beautiful flowers in winter and early spring. They can be grown in clay pots with earth or in fancy bowls with prepared fibre or in water alone. When pots are used be sure to put a piece of broken crock over the hole and a layer of smaller pieces for drainage before putting in the earth. The soil should be of a sandy nature so that water will run through it freely.

Narcissus (daffodils), tulips and hyacinths can all be grown in pots. When planting, place the bulb so that the crown is above the soil. After planting, water well, drain and then place the pots in a cool, dark place to root. When the roots begin to show through the hole at the bottom and the top is beginning to grow, bring the pot into a cool room and keep in a shady spot for a day or two. When the flower buds are beginning to show the plants should be brought into a warmer room and placed near the window. The plants must never be allowed to dry out but must not stand in water.

Another method of growing bulbs is to use fancy bowls and prepared fibre. The fibre is bought from seed-stores. The bowls should be shaped so that the bottom is nearly as wide as the top. The fibre should be evenly moistened but should not be too wet. Put a little in the bowl and place the bulbs on it, using as many as convenient. They should not touch each other nor the sides of the bowl. Do not press the fibre down too firmly, as the bulbs may be forced out of position if the roots cannot penetrate the fibre easily.

Some of the best bulbs for growing in soil or fibre are:

Hyacinths in various colors.
Narcissus: Emperor, Mrs. Plomp, Sir Watkin, Klondyke, Laurens, Kosters, Seagull.

Tulip: (Early) Queen of Netherlands, Mon Tresor, Murillo.

Tulip: (Darwin) Farncombe Sanders, Psyche, Clara Butt, Rev. W. Ewbank.

Some bulbs can be grown successfully in water alone. Hyacinths are grown in specially shaped glasses; Chinese Sacred Lilies and paper white narcissus in bowls. These are kept in place by small stones which are packed around the bulbs. A small piece of charcoal should be added, as it helps to keep the water sweet. All bulbs should be kept in a cool, dark place until they are well rooted and then brought to the light gradually.

—Isabella Preston, Central Experimental Farm, Ottawa, Ont.

YOUR PRINTING NEEDS

The News printing office is now in a better position than ever to attend to your printing requirements. A good quality of stock used on all jobs, and the printing is as good as you can get anywhere. We meet city prices, and in many cases are considerably lower, stock and workmanship considered. May we fill your next order?

VIKING

A play "Turning the Trick" a comedy drama in three acts will be put on at the Community Hall on Tuesday, November 4th. Watch next week's paper for cast of characters and other particulars. This play is being staged under the auspices of the local tennis club.

Mrs. J. Evans left on Friday for Alabama where she will make her future home with a sister who resides there. Mrs. Evans is one of the pioneer women of this district and has seen it develop from the homestead stage to what it is now, one of the foremost agricultural districts in the province.

A very successful and enjoyable card party was held at the home of Mrs. A. Kastor on the evening of Thursday, October 16th, when Mrs. Lordan won first prize and Mrs. Thunell, the Consolation prize. Four tables played.

The annual dinner of the Ladies Auxiliary of the United Church was held in the church hall last Saturday, commencing at five o'clock. As usual the dinner was excellent and many took advantage of the opportunity of having their dinner at the hall. W. McGraw, an old timer of this district, who is now employed near Nampaw, paid a visit to town last week.

Miss Lordan, who has been visiting with Mr. and Mrs. A. Kastor here for the past two weeks, returned to Edmonton on Saturday.

The Y. W. C. T. U. will hold their regular meeting at the home of Mrs. H. M. Hilliker on Thursday evening of this week at 6:30 o'clock.

A. P. Peterson was a recent visitor to points west of Edmonton.

"Ike" McLaren has purchased a large Ford truck with which he is freighting goods between Edmonton and this point.

Miss Gladys Harris and Mrs. Thunell visited in the city the first of the week.

Dave Corbett and Jack Grant were business visitors in town from Kinross today.

Mrs. A. C. Wittmann is here this week attending to the display of ladies coats and dresses at the Toggery.

On October 17th the Tuxis Group were organized under the leadership of Mr. J. W. Bainbridge. An executive decided to meet on Saturday, October 18th and the group look to a very promising and successful year. The officers elected were:

Pretor—Jack Skalkitzky

Secretary—Evel Hardy

Scrip—Gordon Ash

Tally—Don Collier

Press-Reporter—Sandy MacDonald

Youngsters and others are warned that no willful damage to property will be tolerated on Halloween. Those who are thinking of busting up property bear this in mind.

Times may be hard and business and farming conditions depressing but have you asked yourself these questions:

Am I starving?

Is my family in dire need?

Do I enjoy good health?

Have I got sufficient clothing for the winter?

Have I good books and papers to read?

Is my radio bringing the world to me?

Is the car in the garage ready to take me where I want to go?

Am I really enjoying myself any?

Do I live in or near a good town?

Are my neighbors pretty good fellows after all?

Don't the business folk in my town compare favorably with those in any other town?

Don't we all have our trials and troubles to overcome?

Do I sleep in a good warm bed?

Do I sit down to a warm fire at night?

Have I some good horses, cattle and chickens?

Are the farmers at least assured of three square meals a day for the next twelve months?

Have I some good prospects?

Don't I live quite comfortably, whether I am a farmer, businessman, professional man, tradesman or laborer?

Don't I live in the best part of Alberta?

Don't I enjoy the democracy of this Dominion?

What have I to kick about?

Parents are asked to co-operate with the town constable, Mr. Sheets, in having their young sons and daughters off the streets at night and out of the restaurants. Some of them are seen roaming around at a late hour for no apparent reason. Willful damage to property has also been reported. After ten o'clock at least girls and boys of school age, should not be on the streets without their parents or guardian.

Why didn't they play cards in the ark, old top?

Benjamin Noah was sitting on the deck, old dear.

Here and There

(615)

West Canadian cattle almost swept the boards in 16 classes at the Washington State Fair just concluded at Yakima, Wash., when the Holstein show herd owned by the Canadian Pacific Railway Supply Farm at Strathmore, Alberta, won fourteen first prizes and nine second, also taking senior, junior and grand championships in both male and female classes.

A 35½-lb. muskallonge, largest to be taken from the waters of the French River this year, was caught a few days ago by F. R. Spottes, a visitor from Houston, Texas, and was entered in the annual competition for the French River Bungee-low Camp Trophy. The monster was landed after a thrilling fight that lasted forty minutes during which it broke water a number of times. When netted it was found to measure 49½ inches in length and 25 inches in girth. A little later the same fisherman caught an 18-pounder musky.

Modern developments in railroad traffic leading to heavier trains and increased speed is bringing about a concentrated study of the rail weights, according to Grant Hall, senior vice-president of the Canadian Pacific Railway, interviewed recently. The railway, he stated, has used 100-lb. rails since 1921 and is now studying the possibility of weight of steel, particularly in the heavy travel districts between the larger cities and the Rockies, but the heavier trains made possible by greatly increased engine power have combined to bring up the question of 120-lb. rails which is now being studied and on which a final decision will soon be reached.

The history of the folk song in Canada will be illustrated at the Quebec Festival of French-Canadian Folk Songs and Handicrafts which will be held October 16-18 next with headquarters at the Chateau Frontenac. The Canadian Pacific Railway has again planned a comprehensive series of evening concerts of folk-songs, folk-music, dances, and arrangements and children's play parties and dances.

All alarmist talk of world over-production which is wholly unwarranted, according to Dr. W. W. Swanson, head of the department of economics at the University of Saskatchewan, interviewed on board the Empress of Australia on his way back to the Empire Economic Conference. He instanced, in support of his view, the fact that in the midst of the campaign to reduce wheat acreage in the United States a drought had occurred which had reduced the total yield of cereal crops by more than the average wheat crop of the country.

For the second time in two years the Chaugheys Shield, emblematic of the First Aid championship of police forces in Western Canada has come to rest in Vancouver. I was won by the Canadian Pacific Railway police team of that city under the leadership of Constable W. C. Parknell.

Reports from Gloucester, recently stated that the schooner "Gertrude L. Theobald" floated along some six feet under full sail. She is Gloucester's hope of re-establishing the sailing supremacy of the North Atlantic and is scheduled to meet the "Bluenose" of Lunenburg in a race of three miles opening at Gloucester October 9, for a cup of record by Sir Thomas Lipton.

The Quebec Festival of French-Canadian Folk Lore and Handicrafts at which habitant artists born and bred on the soil of Quebec province, and well-known artists from far and wide rival one another in recovering the spirit of Old France, and old New France and the age-old culture of the Galle race, will be held this year October 16-18, according to an announcement made by the Canadian Pacific Railway, organizers of the Festival.

Travelling in two Canadian Pacific special trains, about 250 of the most eminent figures in the British medical world left Montreal for Winnipeg to attend the first convention of the British Medical Association held in Winnipeg. They were preceded by a group of 60 members of the British Tuberculosis Association, who attended a convention of tuberculosis specialists at Nipawit, Man., before going to Winnipeg.

"In view of the fact that this is the last year in which Canada has a seat on the Council of the League of Nations, I could not resist the request made to me by the Prime Minister to represent the Dominion at Geneva," said Sir Robert Laird Borden, former Prime Minister of Canada, as he sailed for Europe recently aboard the Empress of Scotland.

Every activity of the Canadian Pacific Railway was stressed this year at the annual Exhibition at Toronto, which was opened formally by E. W. Beatty, chairman and president of the road. An outstanding feature of the company's exhibit was the model of the new 42,500-ton Empress of Britain, greatest inland Empire passenger vessel, launched by the Prince of Wales last June and to be in service between Quebec and Great Britain next year.

More than \$100,000,000 will be spent in each of the next three years on power production under development in Canada. Although there are other plans for important building projects none will have a more intimate bearing on the industrial development of Canada than those now contemplated by the power industry.

Make dresses bright as new!

DIAMOND DYES are easy to use, go on smoothly and evenly! NEW. Never a trace of that red-dyed look when Diamond Dyes are used. Just true, even, new colors that hold their own through the hardest wear and washing. Diamond Dyes owe their superiority to the abundance of pure anilines they contain. Cost more to make. Surely, but you pay no more for them. All drug stores—15c.

Diamond Dyes
Highest Quality for 50 Years

WORLD HAPPENINGS BRIEFLY TOLD

Alexander Harrison, of Philadelphia, one of the most noted United States painters, recently after a long illness, in his Paris studio. He was 67 years old.

The U.S. weather bureau will issue free warnings from a radio station near Madison, Wis., during the hazardous season, it has been announced by the state department of agriculture.

Medicine Hat statistics show only 210 dwellings in the municipality are occupied by tenants, the balance all being owned by occupants, thus establishing most unique Canadian record.

Plans to hold a re-union of the families and descendants of all former Presidents of the United States in the capital is being fostered in connection with the 1932 Washington bi-centennial programme.

Canada will produce 45,200,000 hundredweight of potatoes this year, according to a forecast made by the Dominion Bureau of Statistics. Last year Canada's crop was 39,550,000 cwt.

Prohibition of advertising of hard liquor in Manitoba has been ordered by the Manitoba liquor control commission. In future, no advertisements will be approved by the board. The ban has been in effect since the beginning of October.

The association of South African Chambers of Commerce, in their annual congress, urged the government of South Africa to pursue a policy of intensive development of trade with the countries of the British Commonwealth.

Discovery of a Socialist bomb plot against the life of Marshal Joseph Pilsudski, premier of Poland, was announced by the semi-official Inter-Agency, and eight members of the Polish Socialist Party were arrested at Warsaw and accused of preparing the plot.

Two Catholic priests and a pilot were killed at Kotzebue, Alaska, when the mission plane "Marquette" crashed. The dead are: Father Philip T. Delon, head of Jesuit Missions in Alaska, and Father Walsh, of the Kotzebue Mission.

Samuel E. McColl, of McColl Brothers Surveying Company, was named director of surveys by the Manitoba Government. He will head a new engineering division operating under the Department of Mines and Natural Resources, formed in connection with the transfer of resources from the Dominion.

Build Big Bridge

Structure Over One Thousand Feet In Length Being Erected At Brossseau, Alberta

Work on the steel superstructure of the new traffic bridge across the Saskatchewan River at Brossseau, Alberta, which is being built by the Department of Public Works, has begun. The bridge is the largest that the department has built for several years, and will be one of the largest in the province, running to something over a thousand feet in length.

DO YOU SUFFER FROM CONSTIPATION?

Countless remedies are advertised for constipation. Many relieve for the moment but they are habit forming, and must be taken. Others contain calomel and dangerous mineral drugs, which remain in the system, settle in the joints and cause aches and pains. Some are harsh purgatives which cramp and gripe and leave a depressed after effect. Avoid lubricating oils which only grease the intestines and encourage nature's machinery to become lazy.

A purely vegetable medicine such as Carter's Little Liver Pills, gently touches the liver, bile starts to flow, the bowels move gently, the intestines are thoroughly cleansed and constipation poisons pass away. The stomach, liver and bowels are now active and the system enjoys a real tonic effect. All druggists 45c and 75c red packs.

W. N. U. 1930.

Advertising Is Good Business

And Is Especially Necessary In Times Of Depression

It is a curious fact that the art of advertising at home is on as high a plane as in any country in the world—but manufacturers and merchants do not seem to have developed the faculty of showing the rest of the world how really good their products are. British traders are inclined, when bad times prevail, to reduce costs by cutting down advertising, a procedure which has been proved time and again to be against all the principles of good business. As was mentioned in a recent article contributed to our columns by a local advertising specialist: "Among experienced advertisers today, it has become an established policy to redouble efforts in bad times, because of the actual results which have been derived in so many instances from the adoption of this policy."—Hong Kong Press.

World's Grain Exhibition

Managing Director Now Touring European Countries To Create Interest In Show

For the purpose of interesting ministers of agriculture and producers' organizations in a number of European countries in the World's Grain Exhibition and Conference to be held in Regina in 1932, John A. Mooney, managing director, is now on a tour of the continent. His itinerary includes the countries of Czechoslovakia, Jugoslavia, Bulgaria, Roumania, Turkey, Greece, Italy, Spain, Portugal, France, Switzerland, Belgium and Holland; and he expects to be back in Canada by the middle of November.

Winnipeg Newspaper Union

(By Eva Tingey)

7274

PRETTYLY DRAPED

All Tingey models are created and sketched in Paris and the patterns are made in New York.

Delightful draping effects mark many of the new bodice and skirt effects, giving almost Greek grace to the youthful dresses.

The model illustrated for today's pattern has a new and charming collar. It forms a pretty drape on one side and is caught with a modern brooch or a button, preferably a jeweled one if the material is rich like satin, crepe-de-chine, uncolored chamois velvet, etc. The model would also cut charmingly in a racoon velvet of which some lovely new designs are to be seen.

To be in keeping with the bodice trim, the skirt drapes prettily on one side where the weight of the fullness of stuff just causes the merest dip at the point. The belt is narrow and of self tissue.

This pattern may be obtained in sizes 14 to 20 and 32 to 42. It is ready for immediate delivery. It is hand cut.

Send 25 cents (in stamp or coin) to Fashion Bureau, Winnipeg, and plainly your name and full address, the number of the pattern and the size you want.

Should Check Up Unemployed

Some May Not Be Deserving Of Government Relief

Unemployment figures in urban centres are augmented each winter through the migration of men who seek steady or farm work in the summer and rather than accept a smaller wage for the winter months or perhaps merely comfortable board they journeyed cityward in the hope of sharing in the jobs handed out by benevolent city councils. Urban municipalities should keep a close check on these migrants and refuse to increase the burden upon their municipalities and the country at large by maintaining these men in semi-idleness for five months out of the year.

It will be grossly unfair to taxpayers everywhere if part of the twenty million dollars appropriated by the Dominion Government and the thousands of dollars that are added to it by the provinces and municipalities is used to maintain the migratory class of laborer who have been offered winter employment and turn it down in order to share in the millions voted for unemployment relief.—Farmer's Advocate.

Recipes For This Week

(By Betty Barclay)

SCALLOPED TOMATOES

Drain one can tomatoes from some of their liquid. Season with salt, pepper, a few drops of onion juice, and 2 teaspoons sugar. Cover the bottom of a buttered baking dish with buttered bread crumbs, cover with tomatoes, and sprinkle top thickly with buttered crumbs. Bake in a hot oven until crumbs are brown.

LEMON TAPIoca SHERBET WITHOUT FREEZING

1/2 cup quick-cooking tapioca.
1 cup sugar.
2 cups water.
Juice of 2 lemons.
2 egg whites.

Put tapioca, sugar and water into double boiler, and cook, stirring often, until clear. Three minutes after removing from fire, add lemon juice. When cool and beginning to thicken, add the stiffly-beaten egg whites, and beat well. Serve with boiled custard or heavy cream.

Advocates Clothing Reform

College Professor Thinks Men Should Wear Dresses

Men should wear dresses, Prof. Albert Bachem, of the University of Illinois College of Medicine, advises.

For health and comfort the ideal garment for men would be loose and flowing, without binding collar or belt, he told the American Physician Therapy Association recently.

"We men, under our garments," he said, "are practically always living in a tropical climate. Women's clothing is much more reasonable."

There are two ways I would suggest to improve our clothing. Either it could be made more porous and consist possibly of one layer, or it could be worn very loosely."

Yukon Big Game

Yukon Territory, Canada, is the paradise of big game hunters and no place on the North American continent today offers greater inducements both for the variety of big game and for the dimensions of the trophies to be secured. Mountain sheep, moose, goat, caribou, and bear are numerous. The moose are of the "giant" species, and bear includes black, brown and grizzly.

Manitoba Stone For Edmonton

The final shipment of Tyndall stone, from the Tyndall quarries in Manitoba, to Edmonton, in connection with the \$250,000 contract for the Alberta Provincial Buildings at Edmonton, has been made ahead of schedule.

Planning New National Park

Proposed Site Is In Manitoba Near Clearwater Lake

The northern Manitoba mineral belt, already established in the commercial field, will have the furthest north national park in Canada if plans of The Paa Board of Trade are carried to fruition. A committee of prominent northerners is now engaged in taking the matter up where the Federal Government left off a few years ago.

The proposed site for the reservation is in the Clearwater Lake region. The lake is at Mile 17 on the Hudson Bay railway and is the most popular resort "north of 53."

The national park agitation dates back several years, and it arises anew through the transfer of natural resources to the province of Manitoba. Word has been received from Winnipeg that the provincial authorities intend to re-survey the park site, and it is possible that the board the matter will be presented to the federal government.

In the federal survey, no provision was made whereby holiday-seekers could title to lands to build cottages. The result has been that several summer homes have sprung up on property set apart for park purposes, and the problem today is to map out territory which will not inconvenience present cottagers in the resort area.

The board of trade committee will investigate the whole situation, and after a report has been made to the board the matter will be presented to the Manitoba Government.

Clearwater Lake is an ideal summer resort in the hinterland. During two months in the summer, the water is warm enough for bathing, while fishing and boating are excellent. At present, the only connection with the Paa is via The Hudson Bay railway, but a motor road survey has already been started and the highway is expected to be completed by next summer.

Less Crime In Britain

Several Prisons Are Closed For Lack Of Occupants

Crime in Great Britain has deteriorated so much that prisons are operating far below capacity, and several have actually closed for lack of occupants, states Dr. Higgins, medical officer of the prison in Liverpool, who arrived in New York recently.

He attributed the decrease in crime to the system of swift justice, strict laws, requiring the closing of saloons at certain hours, and to the fact that a prisoner or a person fined for an offence is kept under close surveillance after his release or payment of the fine.

There was great excitement aboard the liner.

"Man overboard!" was the cry. "Gentlemen overboard, if you please," said Mrs. De Smoob. "That's my husband."

Pencils are being sold by vending machines in Czechoslovakia.

World production of sulphuric acid now is 23,550,000 tons a year.

CANADIAN PACIFIC STEAMSHIPS

Finds Use For Muskeg

May Establish Industry To Produce Insulating Material

An American company with headquarters at Minneapolis, is investigating commercial uses for the northern muskeg with a view of establishing an industry to produce insulating material. While the prospect of using muskeg as an insulating material is something new to the majority of citizens of Canada, it is an old trick of the veteran prospectors in this area.

But hundreds of log cabins of trappers and prospectors in the northern areas of Manitoba and Saskatchewan have been packed with the bog material for years, keeping out both the freezing blasts of the northern winds and the burning sun of northern Manitoba to the entire satisfaction of the owner of the cabin.

No local information can be obtained regarding the investigations by the American firm of the industrial use of muskeg, but early in the spring a substantial shipment of the muskeg left here for the south.

Started In Small Way

The dahlia began its spectacular career most modestly in 1779 when a few seeds were sent from Mexico to Madrid. By 1841 some 1,200 varieties had sprung from this little packet of seeds (not bulbs—"a truly remarkable example," says Dr. Howe "of a plant's capacity for variation when aided by man." Today more than 5,000 varieties are in cultivation, thousands have been discarded and there is a dahlia society in every state.

Lawyer (handing cheque for \$100 to client who had been awarded \$500)—There's the balance after deducting my fee. What are you thinking of, aren't you satisfied? Client—I was just wondering who got hit by the car, you or me?

Starts Mystery Flight

Great Secrecy Surrounds Destination Of British Woman Aviator

Mrs. Victor Bruce, British woman aviator, has started from Heston, Middlesex, air park, on a mystery flight in her single-engine Blériot aeroplane.

The greatest secrecy surrounded her destination. One report credited her with the intention of flying east across Europe to Persia, India, China, and Japan. Another said that she was flying to Alexandria and then down to Cape Town.

There was, still another report, that said she was flying around the world as it would be gone three years.

When coffee was introduced into Europe as a novelty, it was said to be an effective remedy against hysteria and toothache.

USES PINKHAM MEDICINES

Praises Vegetable Compound, Blood Medicine and Liver Pills

Birchtown, Quebec—"I live 13 miles from town on a farm, with all my home

ing to attend to. At the Change of Life, I became nervous and run-down. The Vegetable Compound helped my whole system. My nerves are better, my appetite is good and I am able to do my work. I have also taken the Blood Medicine and the Liver Pills and they helped me. I will answer letters from women asking about your medicines."—Mrs. RICHARD CHARLTON, Birchtown, Quebec.

Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but

allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

CUT DOWN YOUR LOSSES BY INSTALLING WINDOLITE

USE WINDOLITE IN BROODER HOUSES LAYING PENS DAIRY BARN SUNROOMS ETC.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

Too much ACID

Many people, two hours after eating, suffer indigestion as they call it. It is usually excess acid. Correct it with an alkali. The best way, the quick, harmless and efficient way, is Phillips' Milk of Magnesia. It has remained for 50 years the standard with physicians. One spoonful in water neutralizes many times its volume in stomach acids, and at once. The symptoms, such as headaches, gas, heartburn, etc., will disappear in five minutes.

You will never use crude methods when you know this better method. And you will never suffer from excess acid when you prove out this easy relief. Please do that—for your own sake—now.

Be sure to get the genuine, prescribed by doctors for conditions due to excess acid. It is always a liquid; it cannot be made in tablet form. Look for the name Phillips' and the word *genuine* in red.

CHAPTER II.—Continued.

Considering all it meant it was over in an incredibly few minutes, but during the entire time Gay did not look at Nick. She looked at Lincoln, not alone because his familiar visage steadied her, but because if she kept her eyes upon his she couldn't see Josiah K. Miller's beard.

Somehow she found herself shaking hands with the owner of the heard, and nodding dazedly to the clerk and the stenographer. Somehow, with the help of Nick's firm hand, she got down the dark stairway, and into the blinding sunshine of the spring day.

Still she didn't meet Nick's eyes. The whole performance had been a nightmare—a hideous travesty of sacred things. She was hurt and quivering. She glanced down at the gold band on her fourth finger—wondered vaguely where Nick had got it, and realized at its sight that she was married—married without the touch of her husband's lips. The thought that not once during the whole day had Nick been anything but brotherly, suddenly scorched her. Surely, had he loved her ever so little, he would have kissed her! And to let her be married in that dreadful place.

Gay didn't know that, her quick hearing was almost audible. She hardly knew that they were in the car again and had left the highway for a secluded street. She didn't notice that the car had stopped; but she heard Nick say, a trifle hoarsely: "Gay—darling—if I'd known."

And just then a voice broke in upon them: a high shrill, old-man voice. "By gorry! it ain't Nick's fastings!"

They both started, to behold a little man in baggy trousers and a wide-brimmed hat. He was carrying a huge umbrella, and looked to Gay like a character from Dickens; but Nick

beaming, stretched out a cordial hand.

"Why, hello, Mr. Bartlett! Aren't you a good way from home?"

"I be and I ben't," was the enigmatic answer. "Truth is, I've moved since last you come. Couldn't stand the noise from that darn railroad; but no place is ever goin' to seem home to me but the house where I lived with my old woman. This your lady, Nick?"

Nick grinned, and turned to Gay with the familiar light in his blue eyes again.

"Gay, I want you to know Mr. Bartlett, a good friend of mine. This is my—wife, Mr. Bartlett. I've been married since last you saw me. We were taking a little trip."

The old man lowered his umbrella and squinted up out of near-sighted eyes.

"Well, well. Pleasant time to be startin'. Some like fall, but I say, give me spring every time—spring an' apple blossoms. Ain't nothin' prettier. Where you ain't to put up over night?"

"We haven't made any plans. That is, we—"

"I see, I see," interrupted Mr. Bartlett. "That's the way to do. That's the way we'd start out forty years ago, me and my old woman; only we went behind an old white horse. Say, why not use my camp?"

Nick stared a minute. "You mean that bully little cabin on the hillside? The place I found you when I brought over that mortgage for you to sign?"

His voice was eager, and the old man beamed.

"That's it. Awful pretty place to stop. I was there yesterday—cleaned her up—laid the three—look up a lot of canned goods, thinkin' maybe I be goin' to stay a day or so. May need a mile o' dustin', but gorry! so does the Central House! You're welcome to stay long as you want to Nick, that's for your wife like it."

"You wouldn't, would you, Gay?" asked Nick eagerly. "It's the snugest little place you ever saw, with a glorious view of the White Mountains from the porch. Of course, if you'd rather go to a hotel—"

"But I could stay here forever!" he exclaimed, and his regret at leaving "The Bird's Nest," as Gay had christened their first stopping place among the trees, was so apparent that the girl smiled.

"Forever?" she queried. "And what's to become of the ends of the earth you were seeking?"

He straightened up, looking at her with what she secretly called his "new look"—not the comrade-like she had grown up with, but something deeper.

"It sounds rather far away—the ends of the earth," he admitted. "I won't say that it doesn't call me, but in the last week I've discovered qualities I didn't know that I possessed. Perhaps I'm becoming tamed! If I'd had the sense to discover you before, Gay, we'd be living contentedly in my late uncle's house on Elm Street, and you'd be kissing me good-bye each morning at eight-fifteen, when I started for the bank."

(To Be Continued.)

Potatoes For Drouth Area

Through the generosity of North Battleford branch of the Canadian Legion, members of the Assiniboia branch who, through drouth, are hard at leg feet, need, will receive assistance in the gift of a car load of potatoes, that have already been shipped from the northern city for distribution in the district.

Holds Unusual Degree

Canadian Girl Is Master Of Science In Aeronautical Engineering

Miss Elsie Gregory McGill of Vancouver, can now write the letters M.S.E. after her name besides the more familiar B.A., and B.Sc., for she graduated not long ago from the University of Michigan in Ann Arbor with the degree of master of science in aeronautical engineering.

When Miss McGill entered the graduate school of Michigan, she already had the degree of bachelor of science from the University of British Columbia, and another degree in engineering from the University of Toronto.

Toronto fellow graduates will recall her as the only girl student at the school of practical science, when she graduated in engineering, a specially small iron ring had to be made for her finger, as none of the regulation patterns were of any use in this emergency. It was Miss McGill's intention to be an electrical engineer, but later this young British Columbian turned to aeronautics.

Professor Felix Pawlowski, who holds the chair in aeronautical engineering in the University of Michigan, says that during her course at Ann Arbor, Miss McGill displayed not only admirable qualities of character, but also "rather an unusual ability for engineering in general." Her work was of such high standing and she was so generally appreciated by her professors, that in spite of the fact that her health broke down a month before the end of her scholastic year, thus interfering with some of the duties assigned to her, "everybody, nevertheless, was satisfied that she received the degree."

Miss McGill is particularly interested in design of aeroplanes, having already had a certain amount of experience in this direction which she acquired before going to Ann Arbor. She is planning to continue this line of work with the aeronautical industries as soon as her health permits renewed activities.

The most interesting fact in connection with the brilliant Canadian girl is that she is the first woman on the continent to hold a degree in aeronautical engineering, and very likely," says Professor Pawlowski, "the only one in the world at the present time." According to my knowledge, the professor adds, "there are only two women with proper theoretical training in Europe—one in England and the other in Poland—engaged in aero-dynamic research of rather mathematical character." These two women, however, have no degrees in aeronautical engineering.

Douglas' Egyptian Liniment is without a rival. Stops bleeding instantly. Cauterizes wounds and prevents blood poisoning.

Innovation On Linc

Passengers Can Talk Direct To Europe Or America

Direct conversation by wireless telephony from passengers' berths to Europe or to the North American continent whilst on route will be one of the principal features of the "Empress of Britain," gigantic Canadian liner to be completed June, 1931, according to W. H. Annable, assistant steamship passenger traffic manager, Canadian Pacific Railway.

It is expected that the 42,000-ton giantess will occupy only five days on the regular Southampton-Quebec run, and is scheduled for a cruise of the world next year.

Canadian Egg-Laying Contest

The pen of Barred Plymouth Rocks entered by Mrs. W. J. Thompson, of Birch Hill, Saskatchewan, continues to lead in the 11th Canadian Egg Laying Contest at the Dominion Experimental Farm in Ottawa, with a score of 17,701 points. The pen lead is now 49.9 points ahead of the nearest competitor, with only a few points separating the second and third.

Visitor—"You seem to have been very lucky in your shipwrecks." Ancient Mariner—"I've that, sir. Why, would you believe it. I was once marooned on a desert island with a case of whisky and a chap too was a staunch teetotaler."

Minard's Liniment For Chest Congestion.

New Paving Material

City Of Calgary Experimenting With Bituminous Sands

An experimental bituminous sands from the Fort McMurray district in Northern Alberta was being tried in the city of Calgary public works, it was stated recently by Commissioner A. G. Graves, following a visit from a representative of the company which is exploiting the sands.

About 30 tons had been ordered, he said, and some of it was already in use for cross-roads, sidewalks, and so forth. It had been found necessary to mix it with sand and gravel according to a formulae decided upon by city chemists, but even with the added labor of mixing the product was very economical for the use to which it had been put. Commissioner Graves was not prepared to say anything just yet about the lasting qualities of the material, but said that it appeared to be giving satisfaction. Further experiments would have to be made before it was decided to extend the use of it to roads.

NO MEDICINE LIKE BABY'S OWN TABLETS

For Either the Newborn Babe Or the Growing Child

There is no other medicine to equal Baby's Own Tablets for little ones—whether it be for the newborn babe or the growing child the Tablets always do good. They are absolutely free from opiates or other harmful drugs and the mother can always feel safe in using them.

Concerning the Tablets, Mrs. John Armour, R.R. 1, South Monaghan, Ont., says: "We have three fine, healthy children, to whom when a medicine is needed, we have given only Baby's Own Tablets. The Tablets are the best medicine you can keep in any home where there are young children."

Baby's Own Tablets are a mild but thorough laxative which regulate the stomach and bowels; banish constipation and indigestion; break up colic and mucus fever, and make teething easy. They are sold by medicine dealers or direct by mail at 25 cents a box from "The Dr. Williams' Medicine Co., Brockville, Ont."

Riot Caused By Umbrellas

Indian Low Castes Carried Them For a Day

A job lot of western umbrellas and shoes caused a riot on the Lacadivite mission, 150 miles off the Malabar coast. The Koyas, or aristocracy of the island—long ago decreed that they alone might go shod and carry umbrellas but when the western shipment came in the Malamis, or sailor caste, and the Melachers, who pick cocoanuts, decided to try dressing up. They picked 11 Melachers and nine Malamis to defy the old edict and it was a gala day for the strutting low castes until the Koyas' chief heard about it and ordered out his spearmen. After the fight the mannequins found themselves in jail.

Minard's Liniment has a hundred uses.

There weren't so many complaints about hard times when a man didn't consider it a disgrace to go around with a patch on his pants.

"What steps ought to be taken," asks a writer, "to reduce the number of street accidents?" We suggest long, quick ones.

HEAD HURT?

WORK won't wait for a headache to wear off. Don't look for sympathy at such times, but get some Aspirin. It never fails.

Don't be a chronic sufferer from headaches, or any other pain. See a doctor and get at the cause. Meantime, don't play martyr. There's always quick comfort in Aspirin. It never does any harm. Isn't it foolish to suffer any needless pain? It may be only a simple headache, or it may be neuralgia or neuritis, Rheumatism, Lumbago. Aspirin is still the sensible thing to take. There is hardly any ache or pain these tablets can't relieve; they are a great comfort to women who suffer periodically; they are

DEPRESSION

"I'm a different woman"

"Two years ago I began to get depressed, and everything was so much trouble for me. I was a misery to myself and everyone around me. I was advised to take Glauber's Salts by my friends who said it was the same as Kruschen but it didn't do me good. So at last my husband got me a bottle of Kruschen and no one would realise the different woman I am. I have been taking Kruschen now constantly for two years. My daughter also would not be without it. I have got my neighbour to take Kruschen as well and she has found its worth as she feels a different woman."

(Mrs. G. A. K.)

The commonest cause of depression is partial constipation—an insidious complaint because the sufferer is seldom aware of it. It means the gradual accumulation of body poisons which dull the mind, damp the spirits, sap the nervous strength and lower the whole vitality.

Kruschen Salts make constipation impossible. Therefore, if you keep to Kruschen you need never know the meaning of melancholy; never feel "nervy" or depressed.

Little Helps For This Week

"Whatsoever thy hand findeth to do, do it with thy might."—Ecclesiastes ix. 10.

So the work that's nearest. Though it's dull at times. Helping when we meet them. Lame dogs over stiles.

—Charles Kingsley.

Few are needed to do the out-of-the-way tasks which startle the world, and one may be most useful just doing common-place duties, and leaving the issue with God. And when it is all over, and our feet will run no more, and our hands are helpless, and we have scarcely strength to murmur a last prayer, then we shall see that instead of needing a larger field we have left untold many corners of our single acre, and that none of it is fit for our Master's eye were it not for the softening shadow of the Cross.—George Macdonald.

An Oil Of Merit.—Dr. Thomas' electric Oil is not a jumble of medicinal substances thrown together and pushed by advertising, but the result of the careful investigation of the healing qualities of certain oils as applied to the human body. It is a rare combination and it was kept public favor from the first. A trial of it will carry conviction to any who doubt its power to repair and heal.

Up-Keep Is Expensive

Costs More To Run New York City Than Canada

The 1931 budget of New York City will amount to a new high record of at least \$632,400,000, a survey of New York's expenses, past, present and future, indicated.

This would amount to \$67,630,272 more than the budget for the current year and would be the greatest increase in the history of any city anywhere.

The entire governmental expense for the Dominion of Canada in 1929 was about \$281,400,000 in round figures, below the city budget that is expected in 1931.

Motorist: "That garage man says we're carrying entirely too heavy a load."

Back Seat Adviser: "Couldn't you throw out the clutch, dear?"

always to be relied on for breaking up colds.

Buy the box that says Aspirin and has Genuine printed in red. Genuine Aspirin tablets do not depress the heart. All druggists.

CHILDREN CRY FOR IT—

CHILDREN hate to take medicine as a rule, but every child loves the taste of Castoria. And this pure vegetable preparation is just as good as it tastes; just as bland and just as harmless as the recipe reads.

When Baby's cry warns of colic, a few drops of Castoria has his "soothed asleep again a jiffy. Nothing is more valuable in diarrhea. When coated tongue or bad breath tell of constipation, invoke its gentle aid to cleanse and regulate a child's bowels. In colds or children's diseases, you should use it to keep the system from clogging.

Castoria is sold in every drugstore; the genuine always bears Chas. H. Fletcher's signature.

Fletcher's CASTORIA

UNDER CONTROL

--- OR ---

NO CONTROL?

UNDER CONTROL: with beer being sold by reputable licensed hotels under government supervision.

NO CONTROL: with bootleggers running rampant as in the old prohibition days.

Reasons why you should NOT sign the prohibition petition urging the government to abolish the sale of beer by the glass or bottle, thus doing away with the beer rooms, clubs and canteens.

1. The proposal to disturb the act comes from a small body of people whose social theories have not withstood the test of actual experience.

2. The Trades and Labor Congress are on record as being in favor of the sale of beer-by-the-glass.

3. By virtue of the local option provisions of the act, communities may extinguish a license when a majority of public opinion so expresses itself.

4. No license has been withdrawn as a result of a local option vote either in 1929 or 1930, though licenses attacked were at points where conditions appeared to the prohibitionists, as favorable to a dry result.

5. In a total of 58 local option votes taken since the act came into force only four licenses have been cancelled as a result of votes; and these licenses were, in every case, adversely affected by peculiar local influence.

6. Absence of criticism at the last two provincial elections.

7. Hotel accommodation, particularly at country points, has improved as a direct result of the act, to a standard unequalled in any other province.

8. The general endorsement of the act by the travelling public and the willingness of the public generally to assist in enforcing the act by giving information regarding infractions and interdicting those needing protection from their own weakness.

9. Bootlegging and moonshining have been eliminated as remunerative pursuits. This, together with strict government control, has placed all intoxicating liquor beyond the reach of minors; fewer cases of intoxication in the police courts, in spite of a considerable increase in population. Leave the police of the province free to perform their natural functions, that of protecting the people, not taking up their time trying to enforce what has proved to be unenforceable legislation. Remember you cannot legislate men's minds, because they will never obey a law they do not respect. This was proven in prohibition days.

10. The operation of the act provides a large public revenue (4 1-2 cents of every 10c expended) this has helped to increase the general revenue of the province and prevent increased taxation. Formerly such revenue went to the bootleggers and moonshiners.

11. Official reports commend the act as eminently practical. They contain no important criticism of the act's clauses. Police reports indicate a continuous improvement in the general state of law and order.

12. The real motive prompting the petition is to render the act unworkable by eliminating the retail sale of beer-by-the-glass or bottle; the ultimate aim being a return to total prohibition.

If beer rooms and clubs are abolished what does the Prohibition Party suggest to take their place? Is it to be liquor for the wealthy and prohibition for the worker?

The Moderation League of Alberta.

BUSY BEE PRODUCT KEEPS CARS FROM FROST

Saskatoon.—No more frozen radiators, say the bees of Saskatchewan, according to Dr. C. F. Patterson, professor of horticulture at the university. He announces he has found that a mixture of two parts honey to one of water will prevent freezing at temperatures under 15 below zero. The mixture, he said, "slushes" but does not freeze.

IMPROVING FAST

Policeman: Miss, you were doing sixty miles an hour!
She: Oh, isn't that splendid! I only learned to drive yesterday.

A Herald subscriber, who is also the father of a very youthful child, tells us that he would rather change a tire while out in a snow drift than change a baby's clothes even while in a comfortable place at home. There are demountable rims for tires, but no demountable clothes for babies. You either know how to put on a baby's clothes, or you don't. If you know, then you were born with that knowledge. It's a gift. It can't be learned. Most mothers have it, but we are talking to poor, ignorant, helpless fathers for whom there is no hope.—Forestburg Herald.

Charlie: "Did you give your wife that lecture on economy you were

talking about?"
Jim: "Yes!"
Charlie: "Any results?"
Jim: "I've given up smoking."

ONE ON DAD
Two modern little girls, on their way home from Sunday school, were solemnly discussing the lesson. "Do you believe in the Devil?" asked one. "No," said the other promptly. "It's like Santa Claus; it's your father."

Main Street

The Irma Ladies Aid met at the home of Mrs. T. Shaw Thursday afternoon.

A daughter arrived at the home of Mr. and Mrs. Freeman Prosser, Friday, October 17th.

Born to Mr. and Mrs. Chas. Anderson, Sunday, October 19th, a daughter.

The fish-pond lady will be there for the children as usual. There will be a large assortment of fancy work and plainer sewing as well as home cooking and candy. Tea will be served afternoon and evening.

The W. A. are holding their whist drive on Thursday, November 6th in the lodge room. Lunch served, prizes given. Adults 50c. There will be a few articles of fancy work sold at this drive.

Mr. M. New returned the first of the week with his baby daughter which he had taken to Edmonton for medical treatment last week. Dr. Greenberg accompanied them to the city and the baby has fully recovered from its ailment.

The Canadian National Railway have had an extra gang composed of some 150 men changing the rails on the main line through Irma this week. These men will take up and replace about three miles of track in one day without interfering seriously with the many trains passing over the line.

Miss M. E. Price was called to her home at Markerville, Alta., last Friday on account of the illness of her mother. Miss Price has advised us that her mother is seriously ill and that she will not be able to return to Irma for some time. Miss Price will be missed by her class of music pupils and by the United Church choir where she had charge of the music, also by her many friends with whom we join in wishing her mother speedy recovery.

After just about a week's real winter weather Central Alberta with a lot of the districts in the other western provinces, is recovering. The past few days have been warm and bright and the snow which covered a large percent of the stoops is fast disappearing. With a few more warm days threshing will be resumed and everybody will be happy. The first of the week sure looked bad and a lot of the farmers thought it would be spring before any more grain was threshed. However conditions have changed and we hope before long the golden grain will again be passing through the separators.

Here and There

(C24)
After a trip through western Canada during which he and his fellow-directors studied at close range business and agricultural conditions in the four western provinces, E. W. Beatty, chairman and president of the Canadian Pacific Railway, recently announced a programme of improvements and extensions to be undertaken forthwith by his railway which may be described as bold in conception and nation-wide in incidence. This work is advanced to the present time from next year and 1932 and will furnish work for farmers and their work animals and absorb as much as possible of the surplus labor in towns and cities.

Speaking at Winnipeg after a tour of western Canada, with E. W. Beatty, chairman and president of the Canadian Pacific Railway, General Sir Arthur Currie said he returned to the east "more proud, more confident of the country than ever before." Admitting that the times were uncertain and anxious, Sir Arthur urged that wealth, opportunity and resources belonged to Canadians and the solution of nation-wide depression was "up to our men and women and I believe in the Canadian breed and the Canadian breed." As an instance of the creation of new wealth in Canada, he cited the Peace River country with which he had been profoundly impressed.

Occupying the entire top floor of the Royal York Hotel Toronto, Canada's most up-to-date radio studios were operated for the first time October 3 with the broadcasting of the Canadian Pacific Railway's "hour of cheerfulness and good music." It will operate a nation-wide radio broadcasting through the winter months.

How high can a fish climb? This is a question over which lovers of angling have often argued and debated. Many experts declare that 50 feet is the maximum for a fish to climb by means of a natural fishway. The Canadian Government Department of Fisheries in an official statement declares that fish in the Mersey River are climbing a fishway 59 feet high and "are making the climb up the river without difficulty."
